Turn Off Antivirus Software

Deactivate or uninstall all antivirus tools.

Click here for tutorial: <https://www.youtube.com/watch?v=CLljr7FyxZ8>

Disable Secure Boot

Required to allow Crusader to run properly.

Click here for tutorial: <https://www.youtube.com/watch?v=z0Yji8RJHK4>

Disable Fast Boot

Stops Windows from skipping critical checks.

Click here for tutorial: <https://www.youtube.com/watch?v=RPhka-gU8CU>

Turn Off Exploit Protection

Disable all options under Windows Exploit Protection.

Click here for tutorial: <https://www.youtube.com/watch?v=AhRU9IUjWk4>

(This video contains how to enable them, you have to just turn it off where he turns it on.)

Disable Core Isolation

Located under Windows Security → Device Security.

Click here for tutorial: <https://www.youtube.com/watch?v=XwBRM6Z303Y>

Uninstall Riot Vanguard and FaceIT

These conflict with Crusader.

Remove ReShade (if installed)

Can cause issues with Crusader.

Remove CheatEngine (if installed)

May lead to crashes or detection.

Run the Software

- - Download the loader and place the folder (containing both .exe and .dll) on your C:\ drive. <https://uniqueloader.com/r6s/>
- - Password for the archive: 123
- - Unzip/unpack the folder.
- - Run the cheat loader as administrator.
- - Copy your purchased key into the Serial Key field (found in your order email).
- - Press Sign In. If a Microsoft .NET Framework error appears, ignore and close it.
- - Press Start Injection Process.
- - Wait for the 'Please Open Rainbow Six Siege' prompt.
- - Launch Rainbow Six Siege using DirectX11 in borderless mode.
- - Once in the main menu, press Insert to inject. The menu will appear top-left.
- - Have fun!

Common Error Fixes

Driver Error 1

Check if antivirus is disabled. Otherwise open a ticket in the discord server.

Driver Initialization Error 1

Go to Windows Security → Device Security → Core Isolation and turn off “Microsoft Vulnerable Driver Blocklist”. Restart pc. Still doesn’t work? Make a new folder on C:\, place the .exe and .dll there and start loader from there. Otherwise open a ticket in the discord server.

Injection Error 1

To resolve this error, ensure the preparation steps were completed 100% correctly. This issue is often caused by antivirus interference. Disable Core Isolation and Real-Time Protection, and fully uninstall any third-party antivirus software, as well as Riot Vanguard and FaceIT.

Game is crashing

To fix this issue, ensure the game is set to borderless mode before injecting. If the issue still persists, verify your game files and try again. If the problem continues and the game crashes, contact us on Discord—we’ll be happy to assist you.

Key Couldn't Find or Expired

To resolve this issue, join our Discord and create a ticket. Once the ticket is created, share your license key so we can reset the HWID linked to it. This will always fix the problem.

ERR_SSL_PROTOCOL_ERROR

To resolve this issue, download a VPN and enable it. The VPN we recommend is <https://1.1.1.1> as it is free & has no ads at all. If you currently already use a VPN, disable it & try again. If the problem continues, contact us on Discord—we’ll be happy to assist you.
