

Onyx Full - Setup Instructions

Preparation

- Deactivate your browser security.
(Otherwise, the download might be blocked or flagged as a false positive.)
- Deactivate or uninstall all antiviruses.
- Make sure secure boot is disabled.
- Make sure you are using UEFI boot, not Legacy boot.
(99% of people with a new PC have UEFI boot enabled automatically, check it here: <https://www.youtube.com/watch?v=KFEVf7vllXI>)
- In Discord Overlay, DISABLE "Enable Game Overlay".
- In Discord Overlay, ENABLE "Enable Legacy Game Overlay".
- In Discord Overlay, ENABLE "Overlay for Tom Clancy's Rainbow Six Siege".
- After the last 3 steps (step 5, 6 & 7) it should look exactly like this:

- Make sure Riot Vanguard and FaceIT are removed from your PC if you have them installed.
(If installed and enabled, they might block the cheat from functioning.)

Run the Software

1. Download the loader and put it on your desktop or C:\ drive.
<https://myloader.cc>
2. Enter your license key on the site to download the loader.
(You can find the key in your order delivery or in your email.)
3. Make sure your Rainbow Six Siege & the anticheat are fully closed.
4. Run the cheat loader as administrator.
5. Your PC will automatically restart after this.
6. Once your PC restarted, download the loader again.
7. Start the cheat loader as administrator.

8. Start Rainbow Six Siege when it asks.

9. Done, have fun!

(The menu is 100% web-based. Your menu is in your browser. Join into a match to directly see the ESP etc. & activate Unlock All in the menu to unlock all skins.)
